

## Summarized migratory connectivity map example

	Atlantic	Central America	Mexico	Midcontinent	Pacific
Atlantic	80%	0%	0%	20%	0%
Midcontinent	11%	14%	8%	67%	0%
Pacific	0%	0%	33%	0%	67%

In this example, the map and table summarize connectivity for populations at a continental scale; from 3 breeding regions (green regions in rows - Atlantic, Midcontinent, and Pacific flyways) to wintering regions (blue regions in columns – flyway and country). Regions can be defined by area of interest or scale. The width of the arrow corresponds to the percent value in the table for each connection.
