

## Research Consultants

Southwick Associates is seeking qualified consulting researchers to assist as needed. The ideal consultant would have 3+ years' experience in the economic and/or human side of fisheries & wildlife management and/or outdoor recreation. Fluency with R or SPSS is a must as is Microsoft™ Word and Excel. Experience in any of the following areas is a benefit:

- Analyzing large datasets and pulling random samples based on findings
- Online survey software
- Statistical modelling software
- GIS programming and analysis
- Emerging social media and online data collection techniques
- Clear and concise technical writing skills

Consultants work from home and select the volume of hours they work and when they work. Working as a consultant in addition to a full-time job elsewhere is acceptable provided there is no conflict of interest between the Southwick project and those you are involved in at your current position.

Southwick Associates has a broad range of projects starting in January 2023. However, the exact timing and duration of the work is unknown at this stage. These positions are ideal for professionals desiring additional income and a flexible work schedule.

If interested, please contact [LBragg@SouthwickAssociates.com](mailto:LBragg@SouthwickAssociates.com).

**About [Southwick Associates](#):** We are a market research economics and statistics consulting firm specializing in serving state fish and wildlife agencies, outdoor equipment manufacturers, conservation and sportsmen's NGOs and supporting businesses. Since 1990, we have been known as problem-solvers, developing solutions and new products now widely used by our client base. Based in Northeast Florida, our employees work remotely from locations of their choosing across the U.S, and frequently work closely as a team.
