AFWA Science and Research Priorities Survey

Science and Research Committee Meeting

(Results Overview)

9/25/2023

Mike Quartuch, Ph.D., Colorado Parks and Wildlife
(AFWA Social Science Subcommittee Chair)

GOAL OF INQUIRY

Identify priority areas and the barriers that stymie agencies ability to address critical conservation challenges to...

- Identify gaps: Survey & 4 regional AFWA landscape plans
- Use priorities to:
 - Shape MSCG process/priorities
 - Inform federal research partners' priorities
 - Help inform other multi-state collaboratives' discussions (SEACAS, Natures' Network)

2023 Revised Science and Research Survey Themes

As you know, this questionnaire will be used by the AFWA Science and Research Committee to identify priority areas that are important to AFWA member agencies as well as the barriers that get in the way of addressing critical conservation challenges.

The questionnaire is only 20 questions and should take you about 10-15 minutes to complete. The five core areas of the survey are: Invasive species; wildlife health/disease; climate change; social science; and diversity, equity and inclusion.

Thanks in advance for taking the time to share your thoughts with us!

Background information

The following information will only be used for our records and will help us verify who participated.

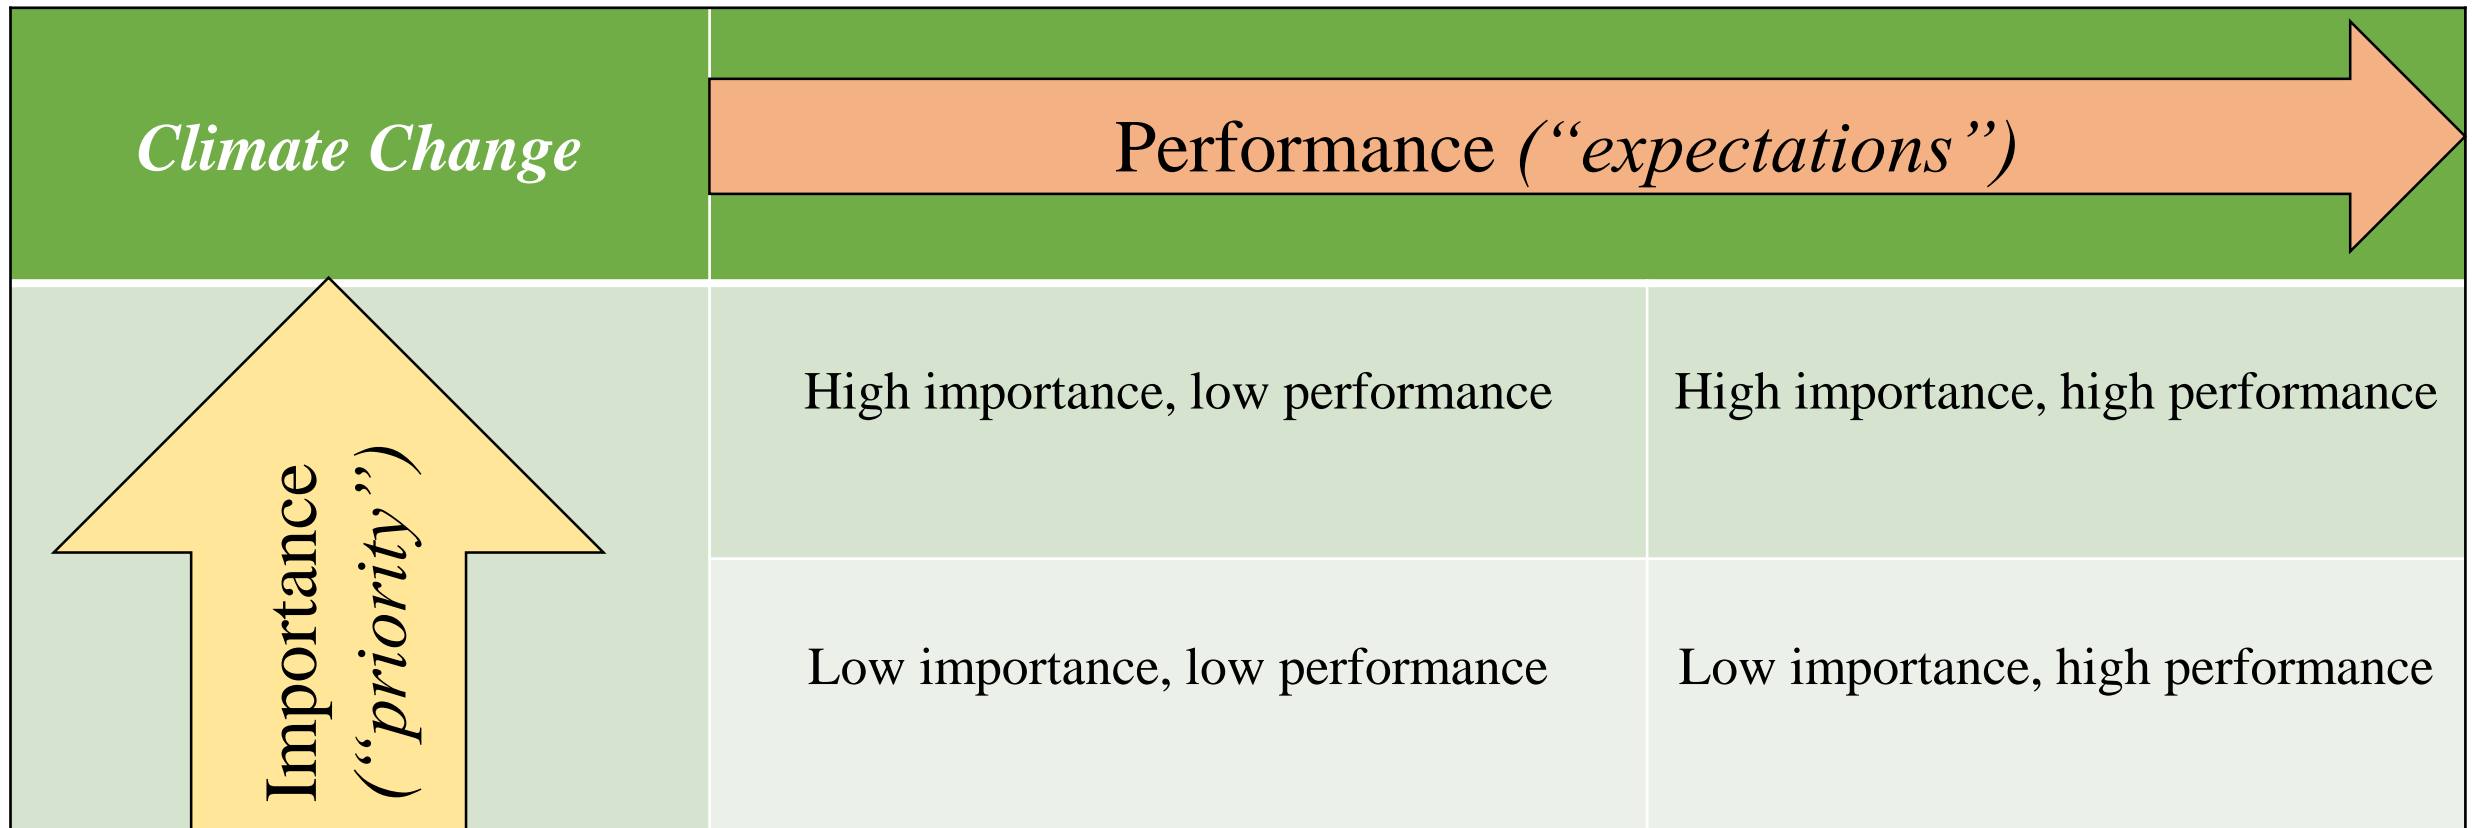

1. What is your first and last name? _____
2. What is your current title? _____
3. What U.S. state or Canadian provincial agency/organization do you work for?
(Note: if you work for a Canadian Province SKIP to Question #INSERT HERE)

4. What is your Email address? _____
5. Do you currently work for a U.S. federal agency, state agency, or Canadian provincial agency?
(Please check one.)
 U.S. federal agency (If checked they'll be moved to Q5a)
 U.S. state agency (If checked they'll be moved to Q5b)

SURVEY DESIGN

20 questions, 3 core themes + social science

- Invasive species, wildlife health/disease, climate change, & social science

QUESTION WORDING

1. Agency research priorities (Not a priority – Essential priority)

*Ex. To what extent are invasive species critical research priorities for our agency across each of the following **categories**?*

2. Addressing them (Below – Exceeding expectations)

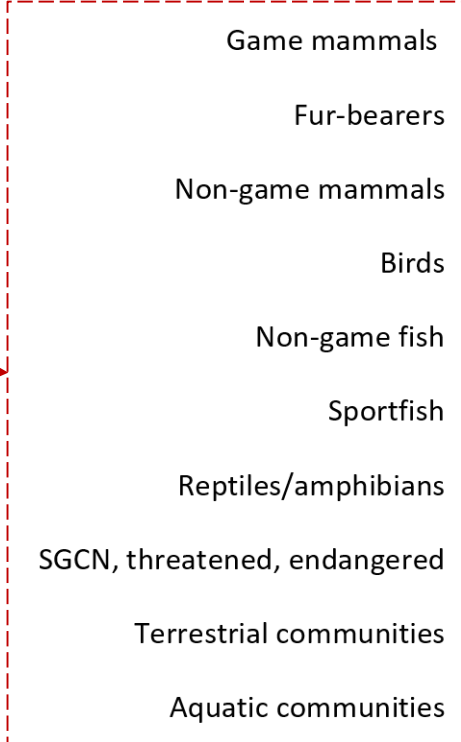

Ex. For each category that you indicated something was a Medium, High, or Essential invasive species research priority above, please specify how well your agency is addressing them.

3. What barriers exists (Not at all – Major barrier)

Ex. To what extent do the following barriers reduce your ability to adequately address those invasive species priorities that you identified as Medium, High, or Essential?

Importance (“priority”)

Performance (“expectations”)

- Game mammals
- Fur-bearers
- Non-game mammals
- Birds
- Non-game fish
- Sportfish
- Reptiles/amphibians
- SGCN, threatened, endangered
- Terrestrial communities
- Aquatic communities

SURVEY IMPLEMENTATION

Qualtrics

- Emailed to 88 individuals (April 24)
- Reminders emailed to non-respondents (May 1, 15, 29)
- Survey closed (June 5)

The screenshot shows the Qualtrics survey editor interface for a survey titled "AFWA Science Survey_2023". The interface includes a navigation menu with tabs for "Survey", "Workflows", "Distributions", "Data & Analysis", "Results", and "Reports". The "Survey" tab is active. On the left, there is a sidebar with icons for "Edit question", "Question type", and "Content type". The "Question type" dropdown is set to "Text / Graphic". The "Content type" dropdown is expanded, showing a list of regional associations with checkboxes: "MAFWA (Midwest Association of Fish and Wildlife Agencies)", "NEAFWA (Northeast Association of Fish and Wildlife Agencies)", "SEAFWA (Southeastern Association of Fish and Wildlife Agencies)", and "WAFWA (Western Association of Fish and Wildlife Agencies)". The question text reads: "Please indicate to which regional association(s) your agency belongs (Please select all that apply)". The survey is marked as "Published" and was saved on April 21, 2023, at 7:58 AM.

RESULTS

58 Responses (*≈ 66% response rate*)

- SEAFWA = 21 responses
 - WAFWA = 18 responses
 - MAFWA = 13 responses
 - NEAFWA = 12 responses
- } Some belong to >1 region

RESULTS

Invasive Species

INVASIVE SPECIES PRIORITIES (“IMPORTANCE”)

*Lowest
priorities*

- 57-69%
Not-Low
priority

Game mammals
Fur-bearers
Non-game mammals

Birds

Non-game fish

Sportfish

Reptiles/amphibians

SGCN, threatened, endangered

Terrestrial communities

Aquatic communities

Not at all a priority
 Low priority
 Medium priority
 High priority
 Essential priority

*Highest
priorities*

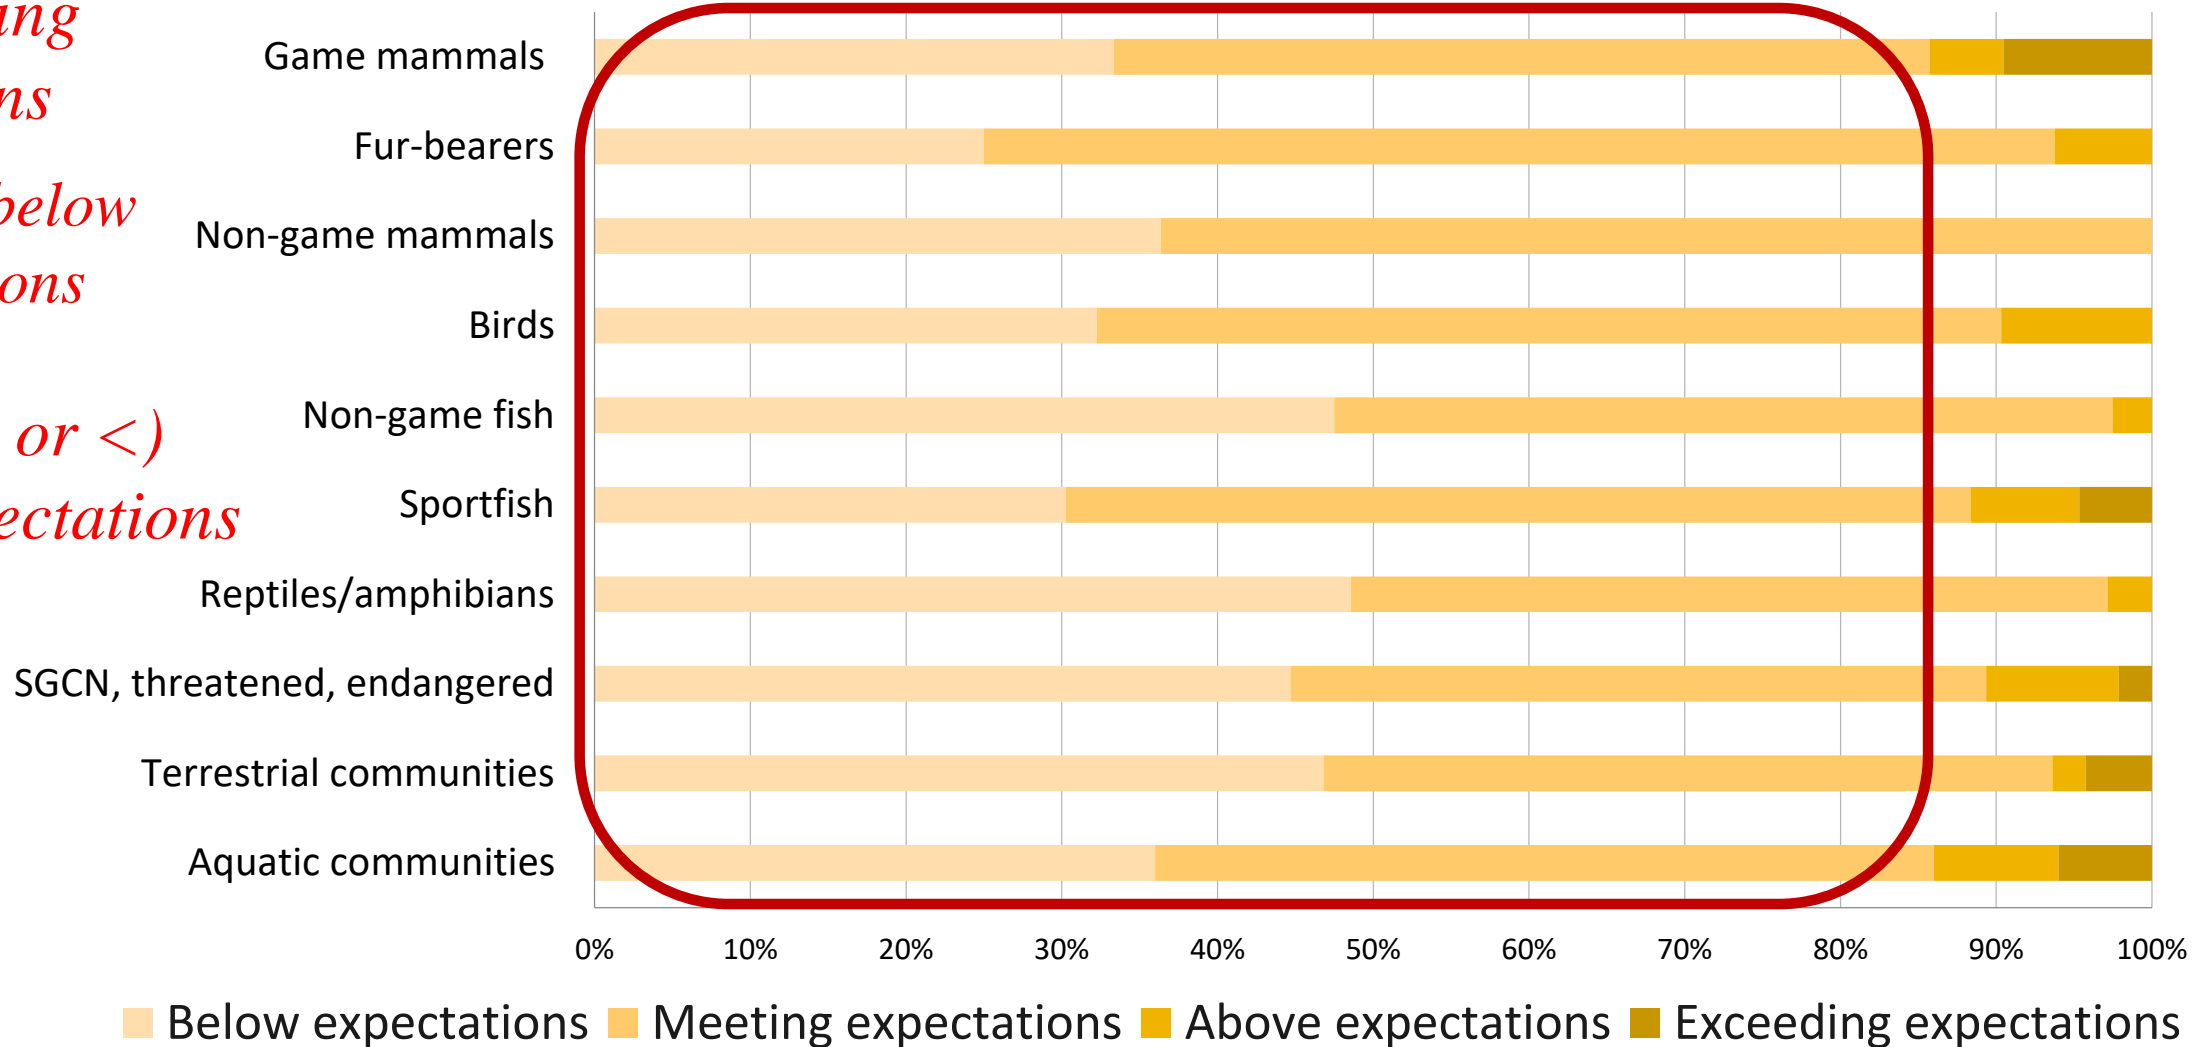

- 65-75%
High+
- 88-92%
Medium+

ADDRESSING INVASIVE SPECIES PRIORITIES (“PERFORMANCE”)

Most meeting expectations

• 24-47% below expectations

Few (15% or <) above expectations

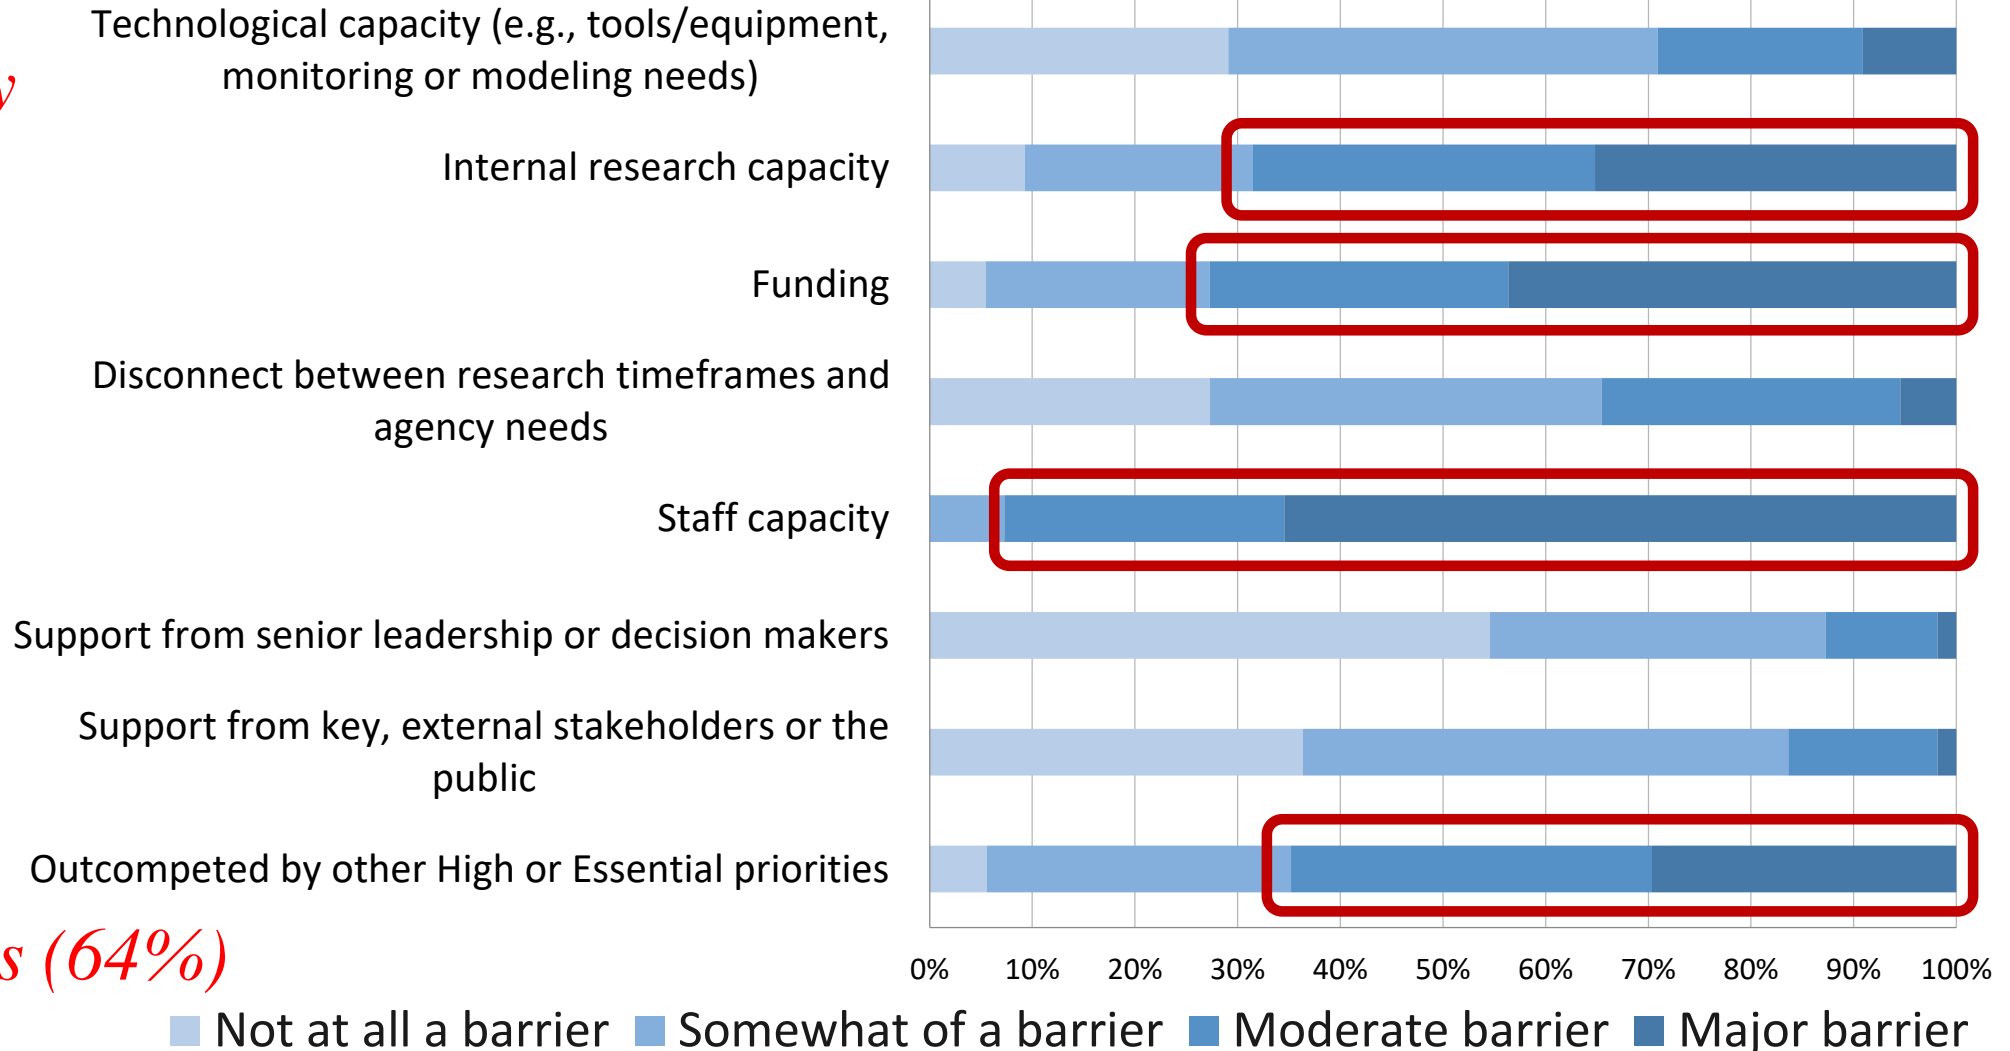

WHAT GETS IN THE WAY? (INVASIVE SPECIES “BARRIERS”)

*1. Staff capacity
(93%)*

*2. Funding
(73%)*

*3. Internal
research
capacity
(68%)*

**Other priorities (64%)*

OVERALL INVASIVE SPECIES SUMMARY

*SGCN, Terrestrial &
Aquatic Communities
(Sportfish)*

Performance (*“expectations”*)

Importance
(*“priority”*)

High importance,
low performance

High importance, high
performance

Low importance, low
performance

Low importance, high
performance

RESULTS

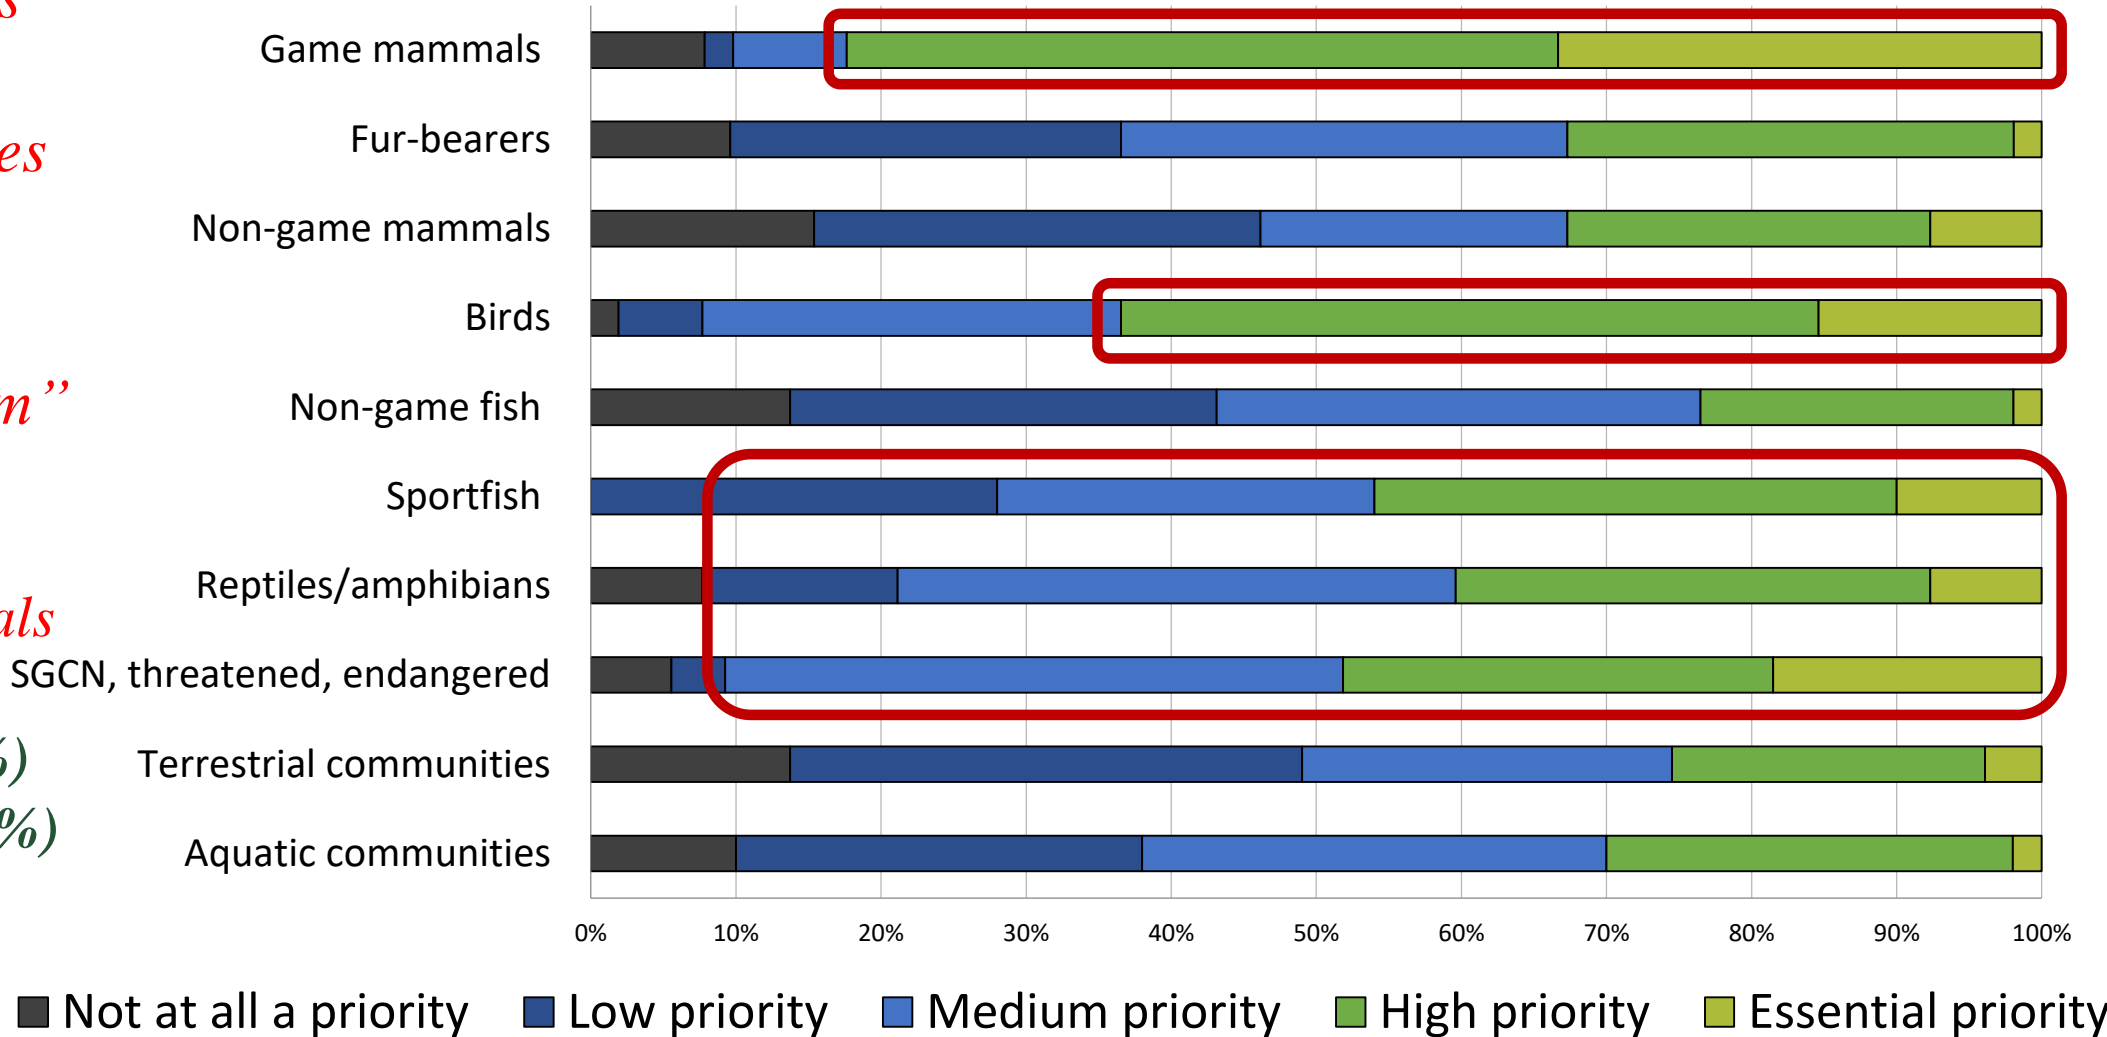

Wildlife Health & Disease

FISH & WILDLIFE HEALTH PRIORITIES (“IMPORTANCE”)

*Game mammals
and Birds are
highest priorities*

Include “Medium”

- *Birds (92%)*
- *SGCN (91%)*
- *Game mammals (90%)*
- *Reptiles (79%)*
- *Sportfish (72%)*

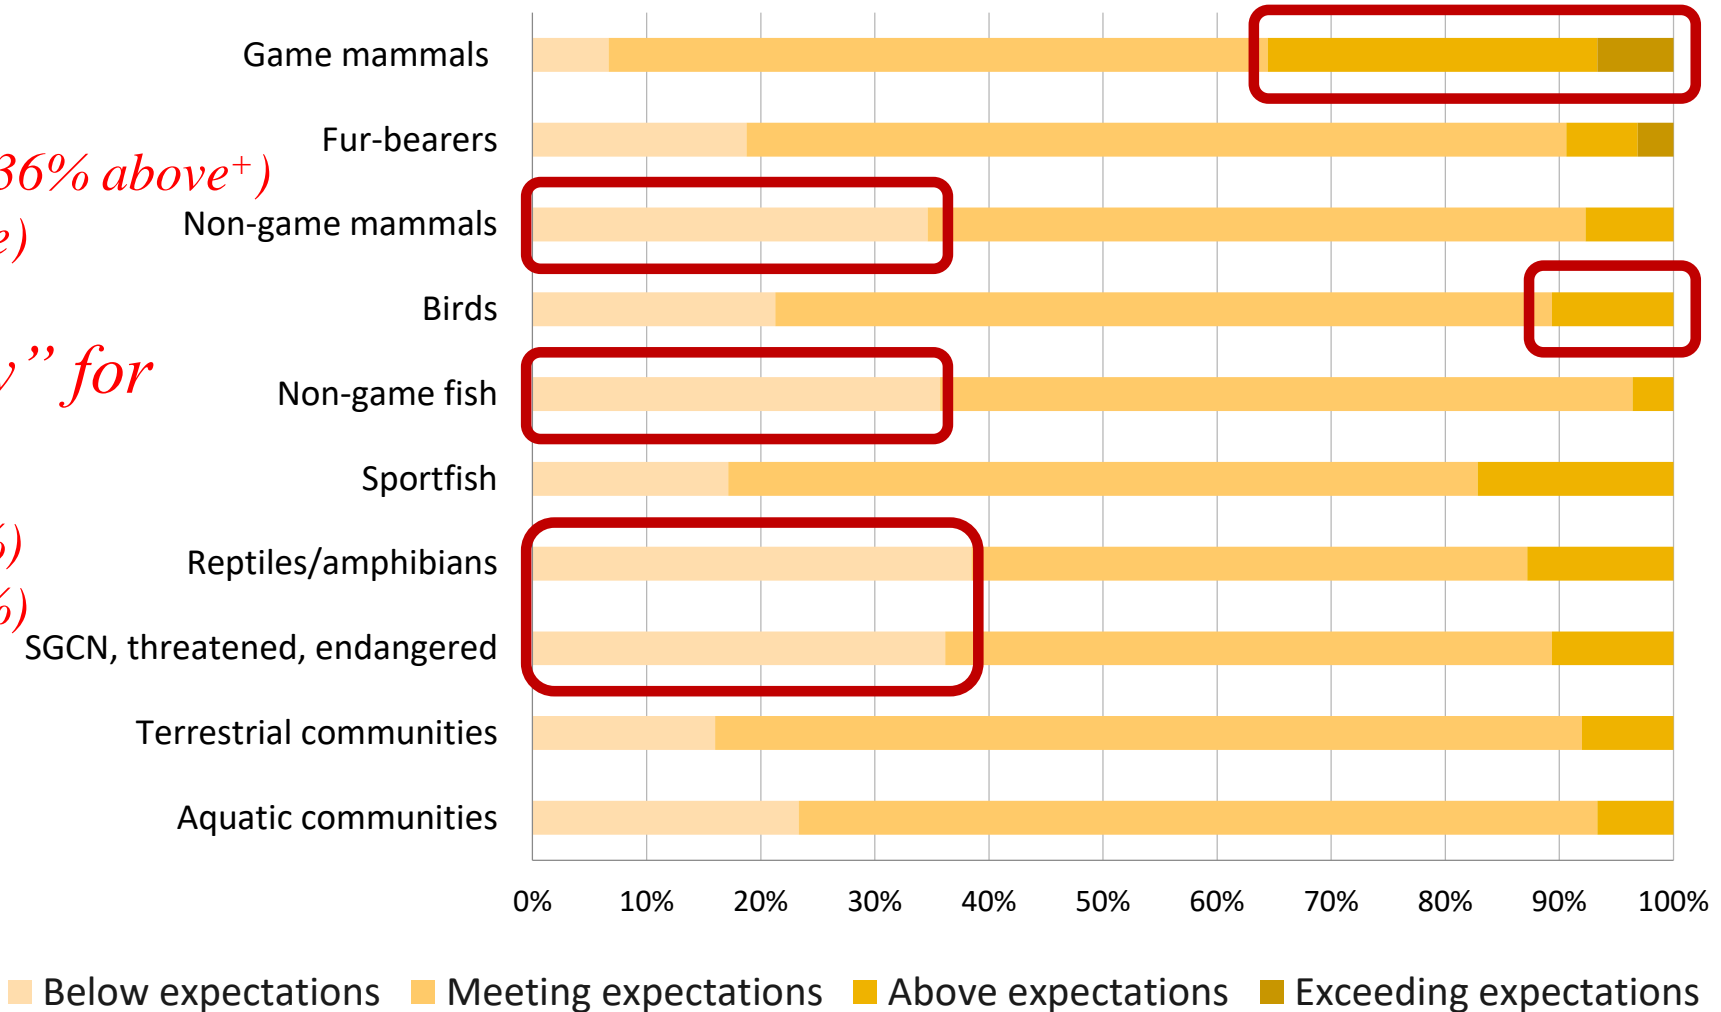

ADDRESSING FISH & WILDLIFE HEALTH PRIORITIES ("PERFORMANCE")

*Most meeting expectations,
more above, few exceeding*

- *Game mammals (93% meeting+ 36% above+)*
- *Birds (78% meeting+; 11% above)*

*4 categories are "below" for
1/3 of respondents*

- *Reptiles/amphibians (38%)*
 - *Non-game mammals (38%)*
 - *SGCN (36%)*
 - *Non-game fish (36%)*
- *Positive: for any med-essential
priorities (62-94% meeting,
above or exceeding)*

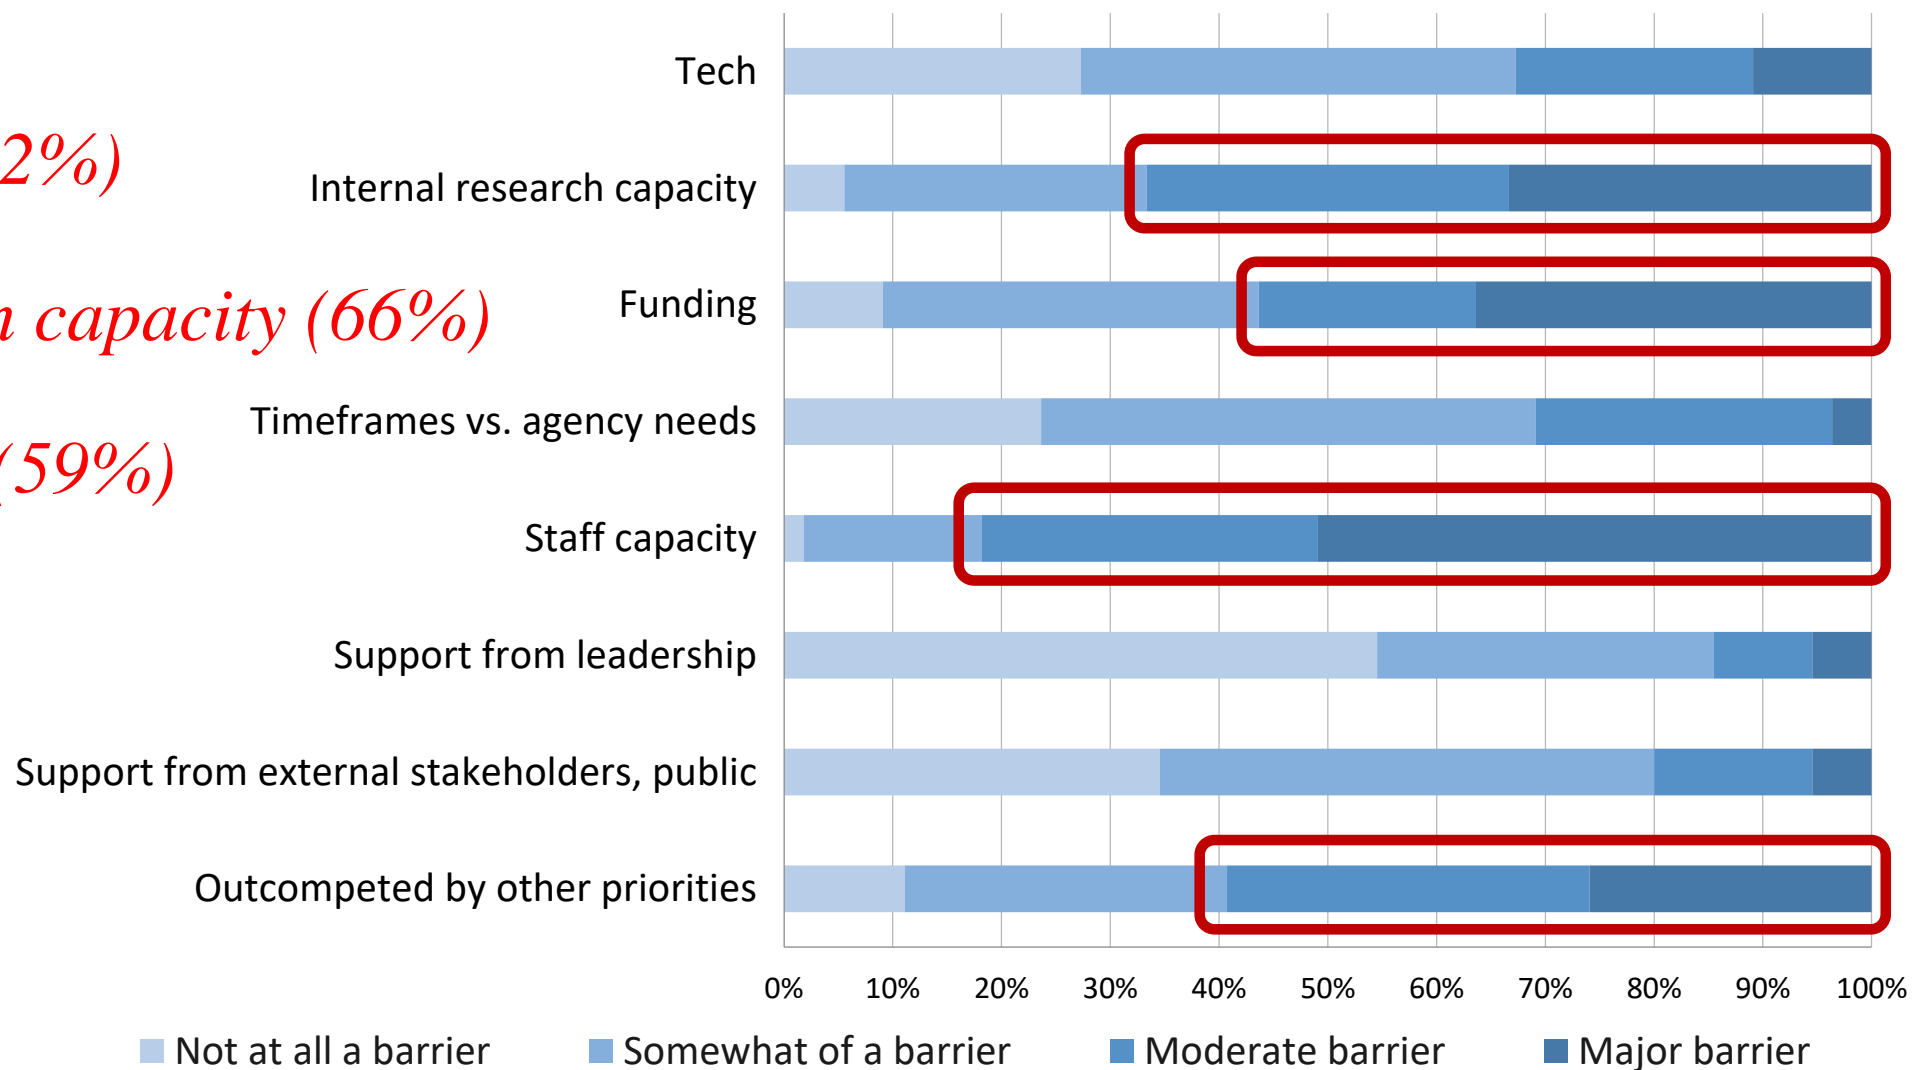

WHAT GETS IN THE WAY? (WL HEALTH “BARRIERS”)

1. Staff capacity (82%)

2. Internal research capacity (66%)

3. Other priorities (59%)

**Funding (56%)*

OVERALL WILDLIFE HEALTH/DISEASE SUMMARY

*Game mammals, birds
(SGCN, sportfish, reptiles)*

Performance (“*expectations*”)

Importance
(“*priority*”)

High importance, low
performance

High importance, high
performance

Low importance, low
performance

Low importance, high
performance

RESULTS

Climate Change

CLIMATE CHANGE PRIORITIES (“IMPORTANCE”)

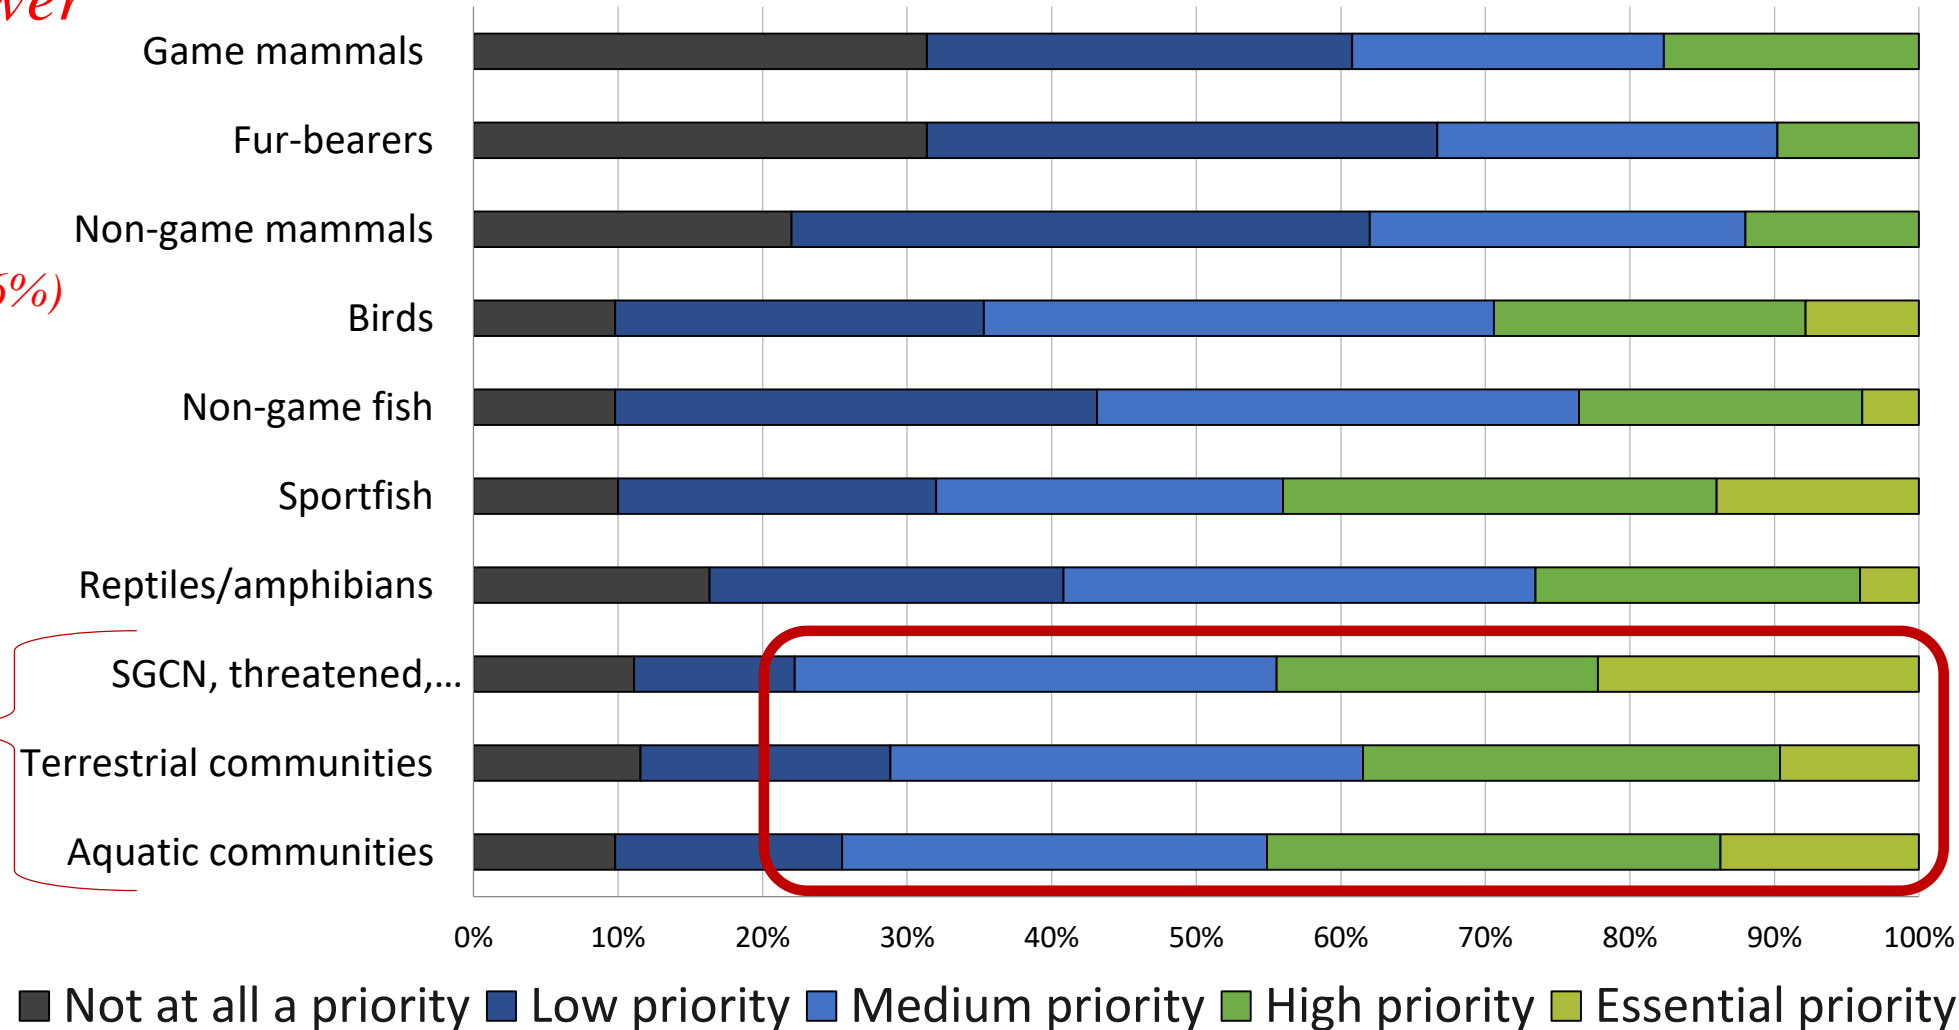

Climate Change lower priority than others

High-Essential

- Aquatic comms (46%)
- SGCN (45%)
- Sportfish (43%)

>70% (w/“med”)

- SGCN (78%)
- Aquatic (75%)
- Terrestrial (71%)

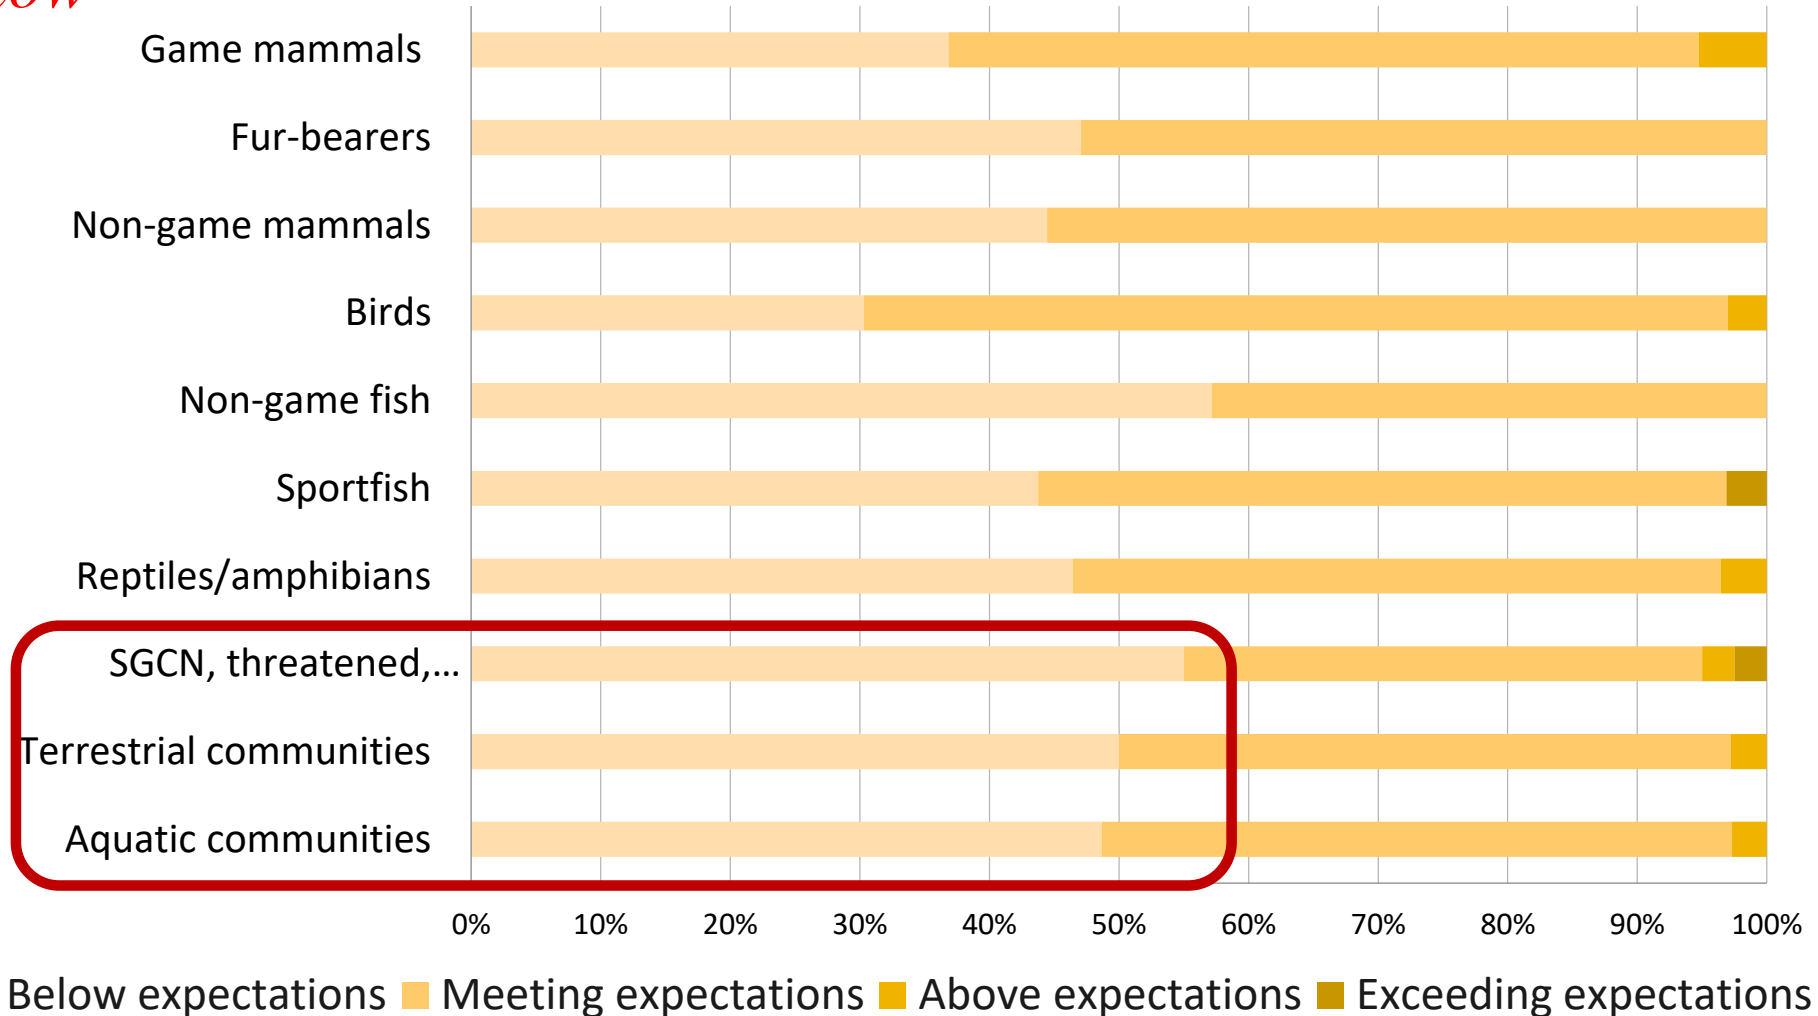

ADDRESSING CLIMATE CHANGE PRIORITIES (“SUCCESS”)?

Overall, greatest % below expectations (30-57%)

- *<5% above⁺*

All 3 highest priorities are around 50% below expectations.

- *Sportfish around 45% below expectations (in top priority for high⁺)*

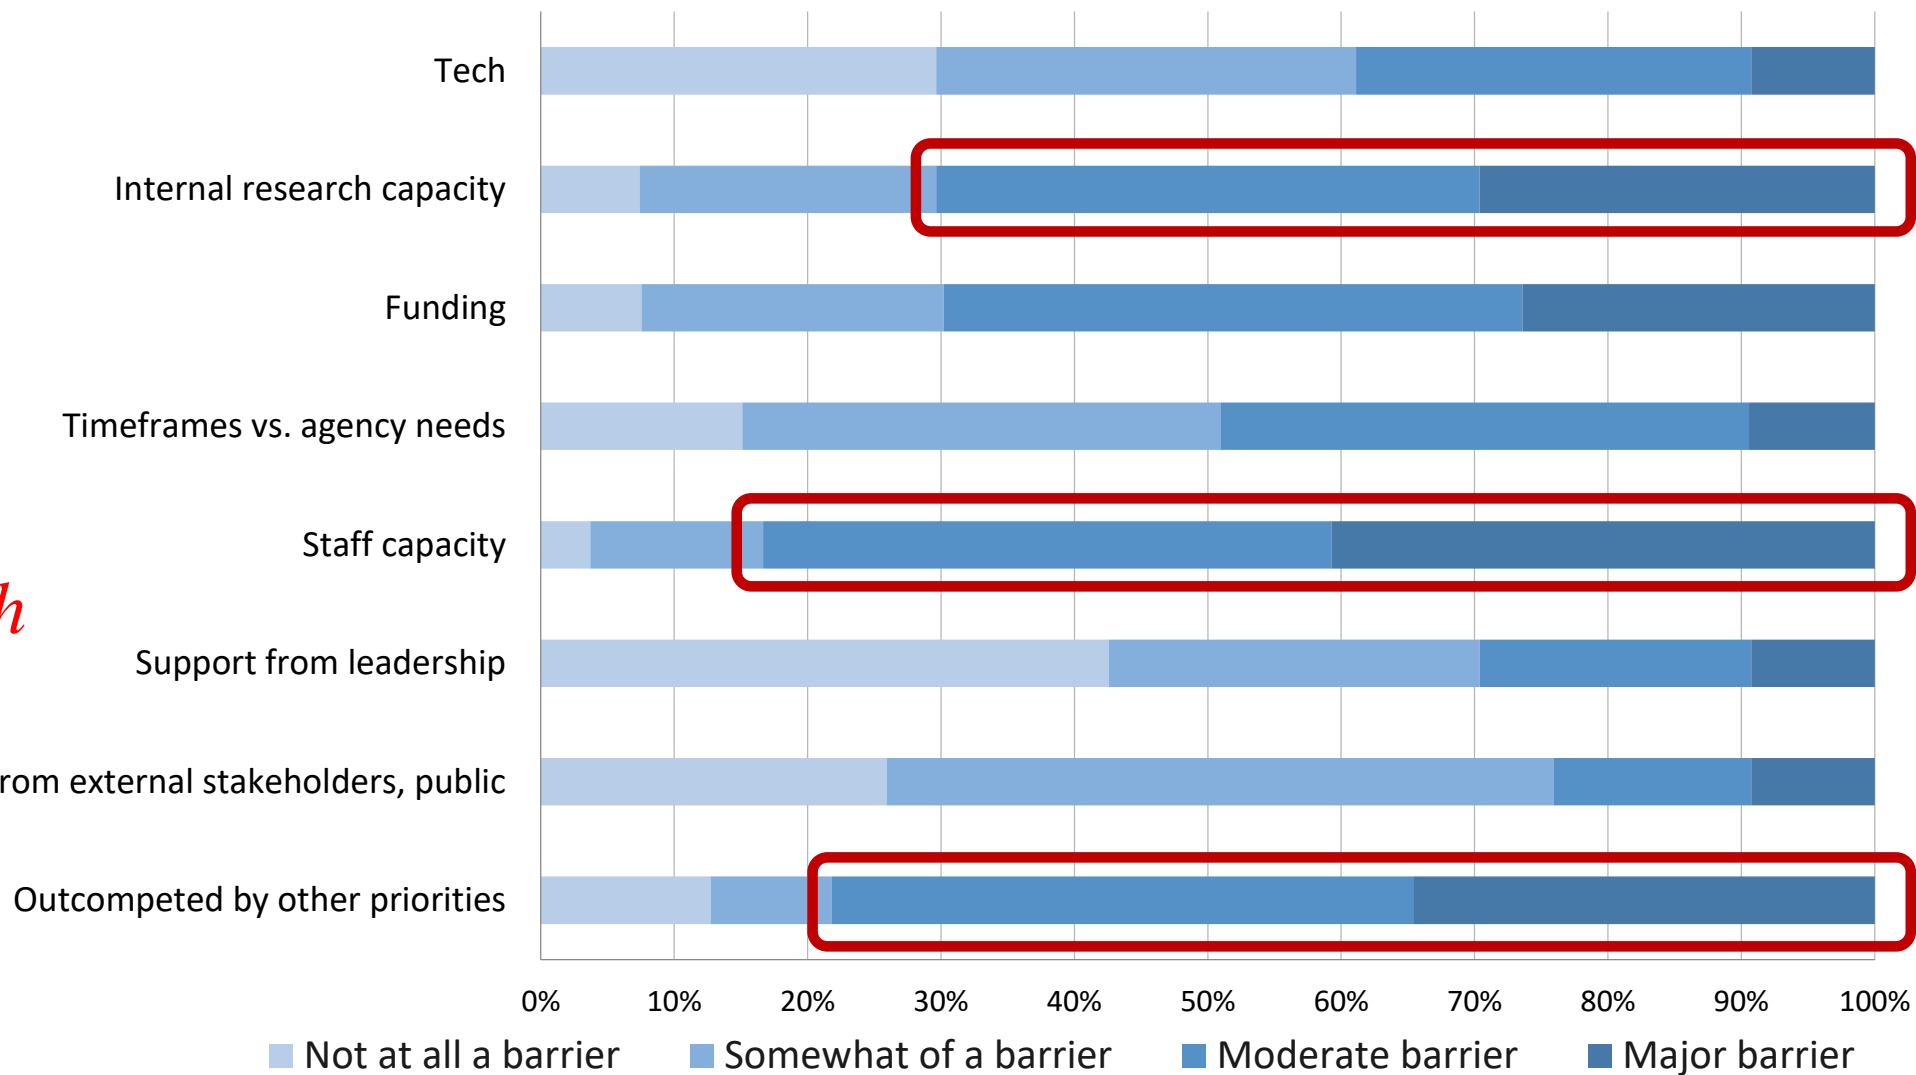

WHAT GETS IN THE WAY? (“BARRIERS”)

1. *Staff capacity*
(84%)

2. *Outcompeted by other priorities*
(79%)

3. *Internal research capacity*
(71%)

**Funding* (69%)

OVERALL CLIMATE CHANGE SUMMARY

*SGCN, Aquatic
communities, Sportfish
(Terrestrial comm's)*

Performance (*"expectations"*)

Importance
(*"priority"*)

Moderate importance, low
performance

High importance, high
performance

Low importance, low
performance

Low importance, high
performance

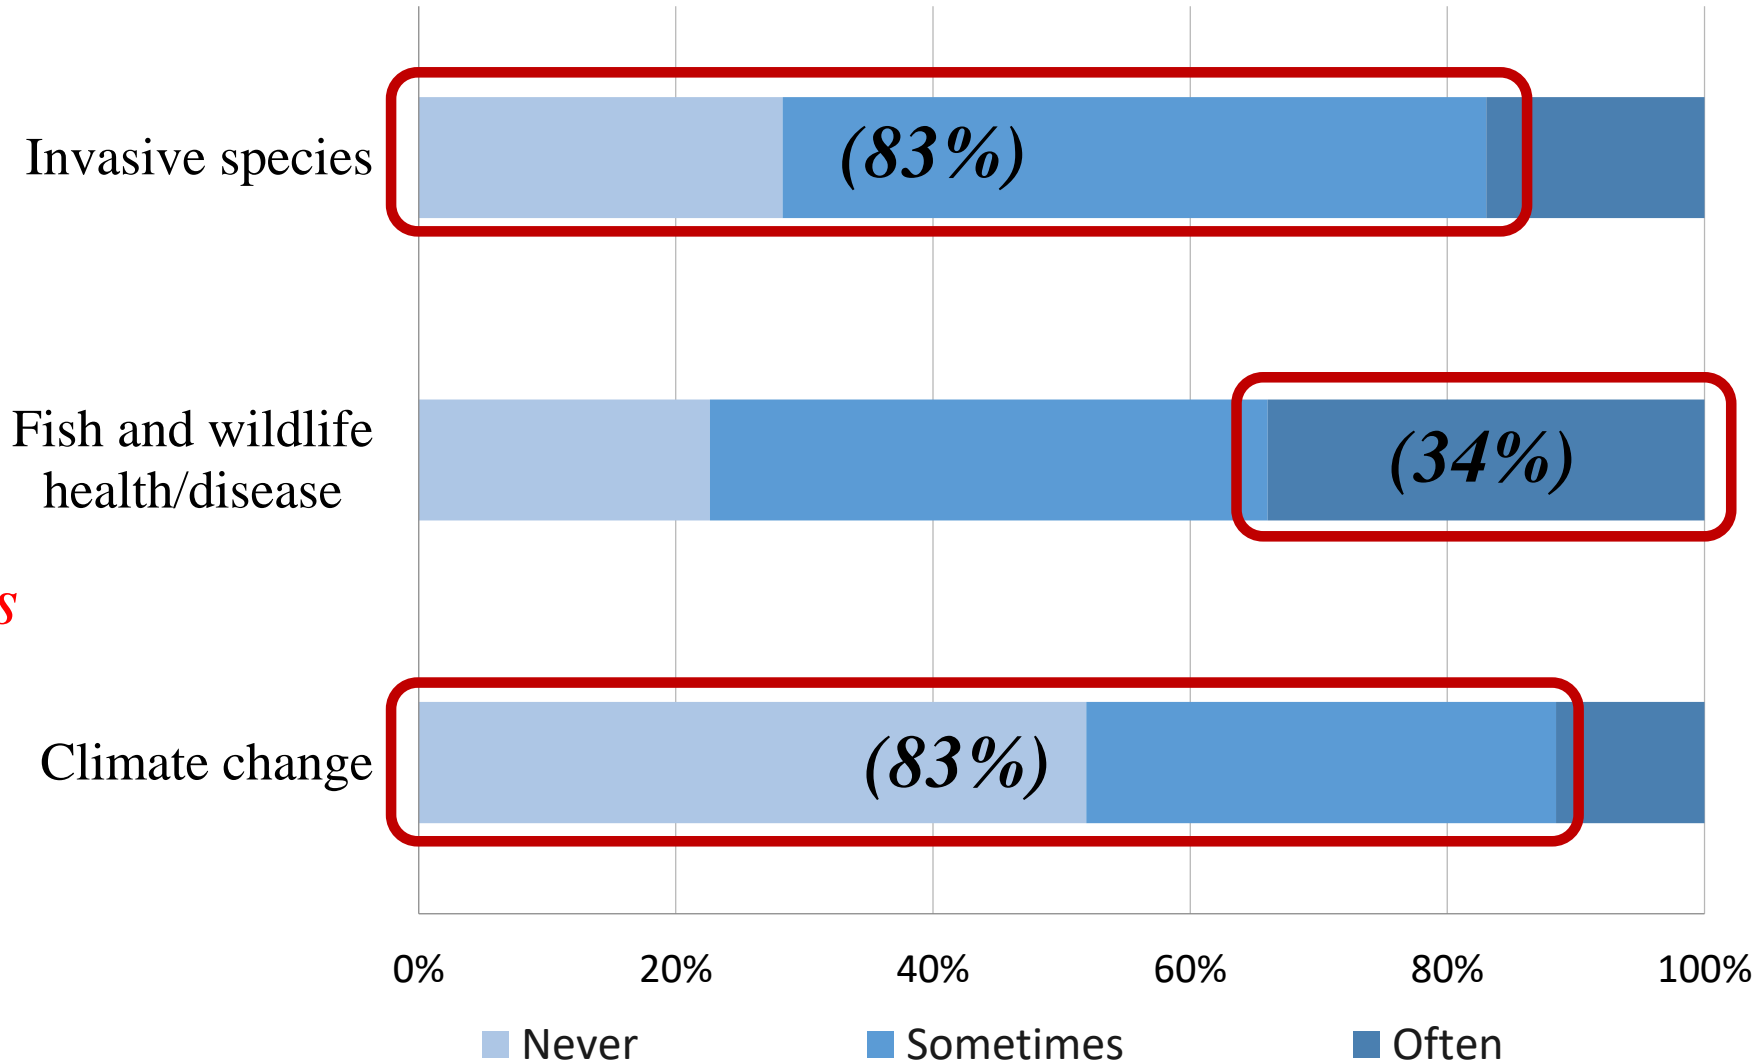

RESULTS

Social Science

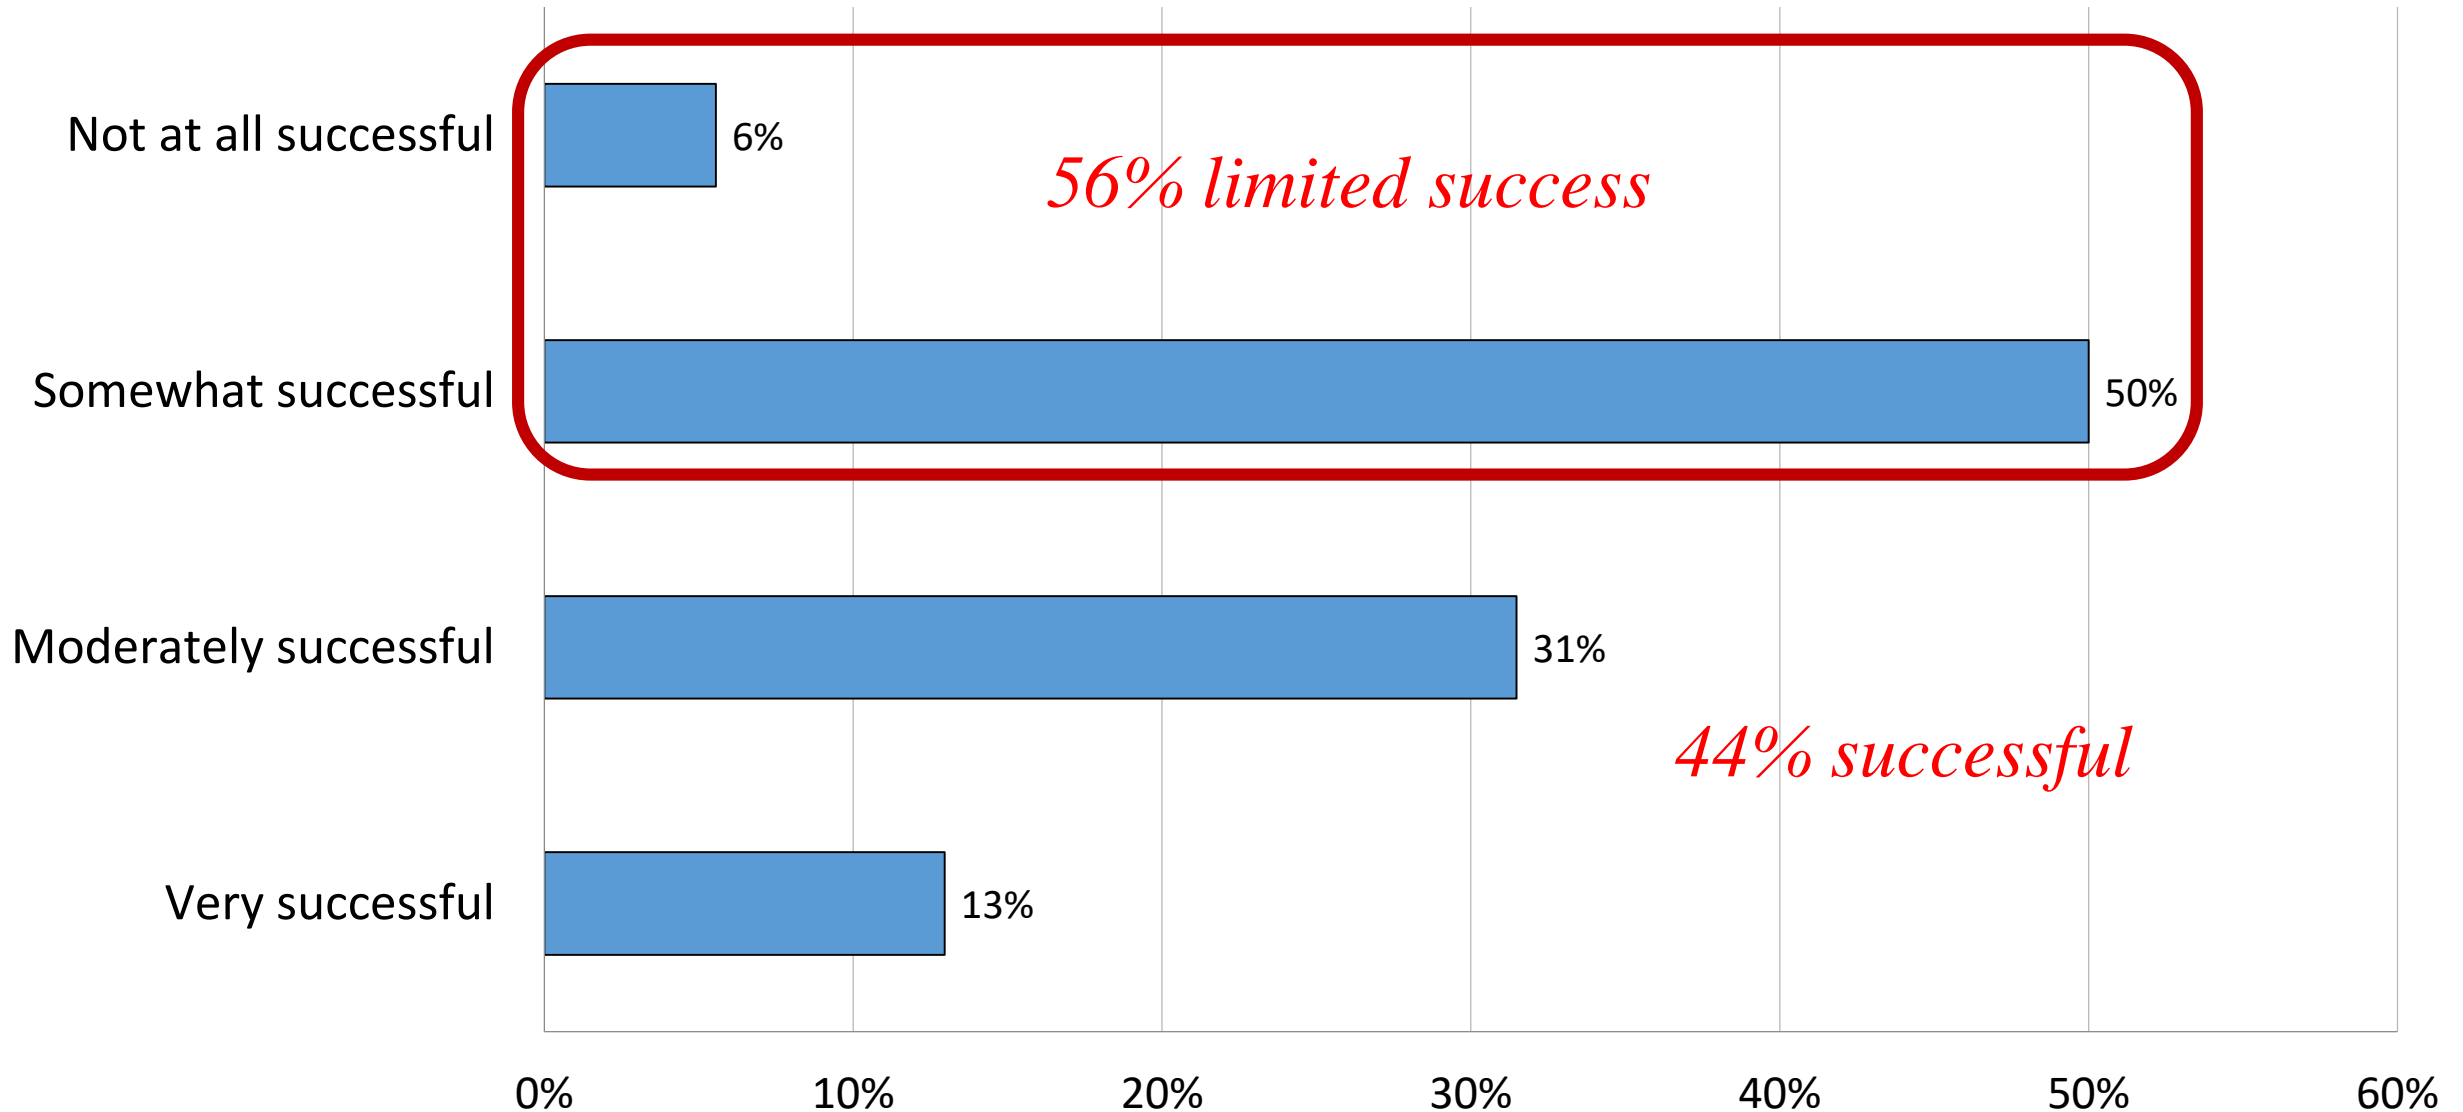

APPLYING SOCIAL SCIENCE

*Social science is used
often in F&WL health
research*

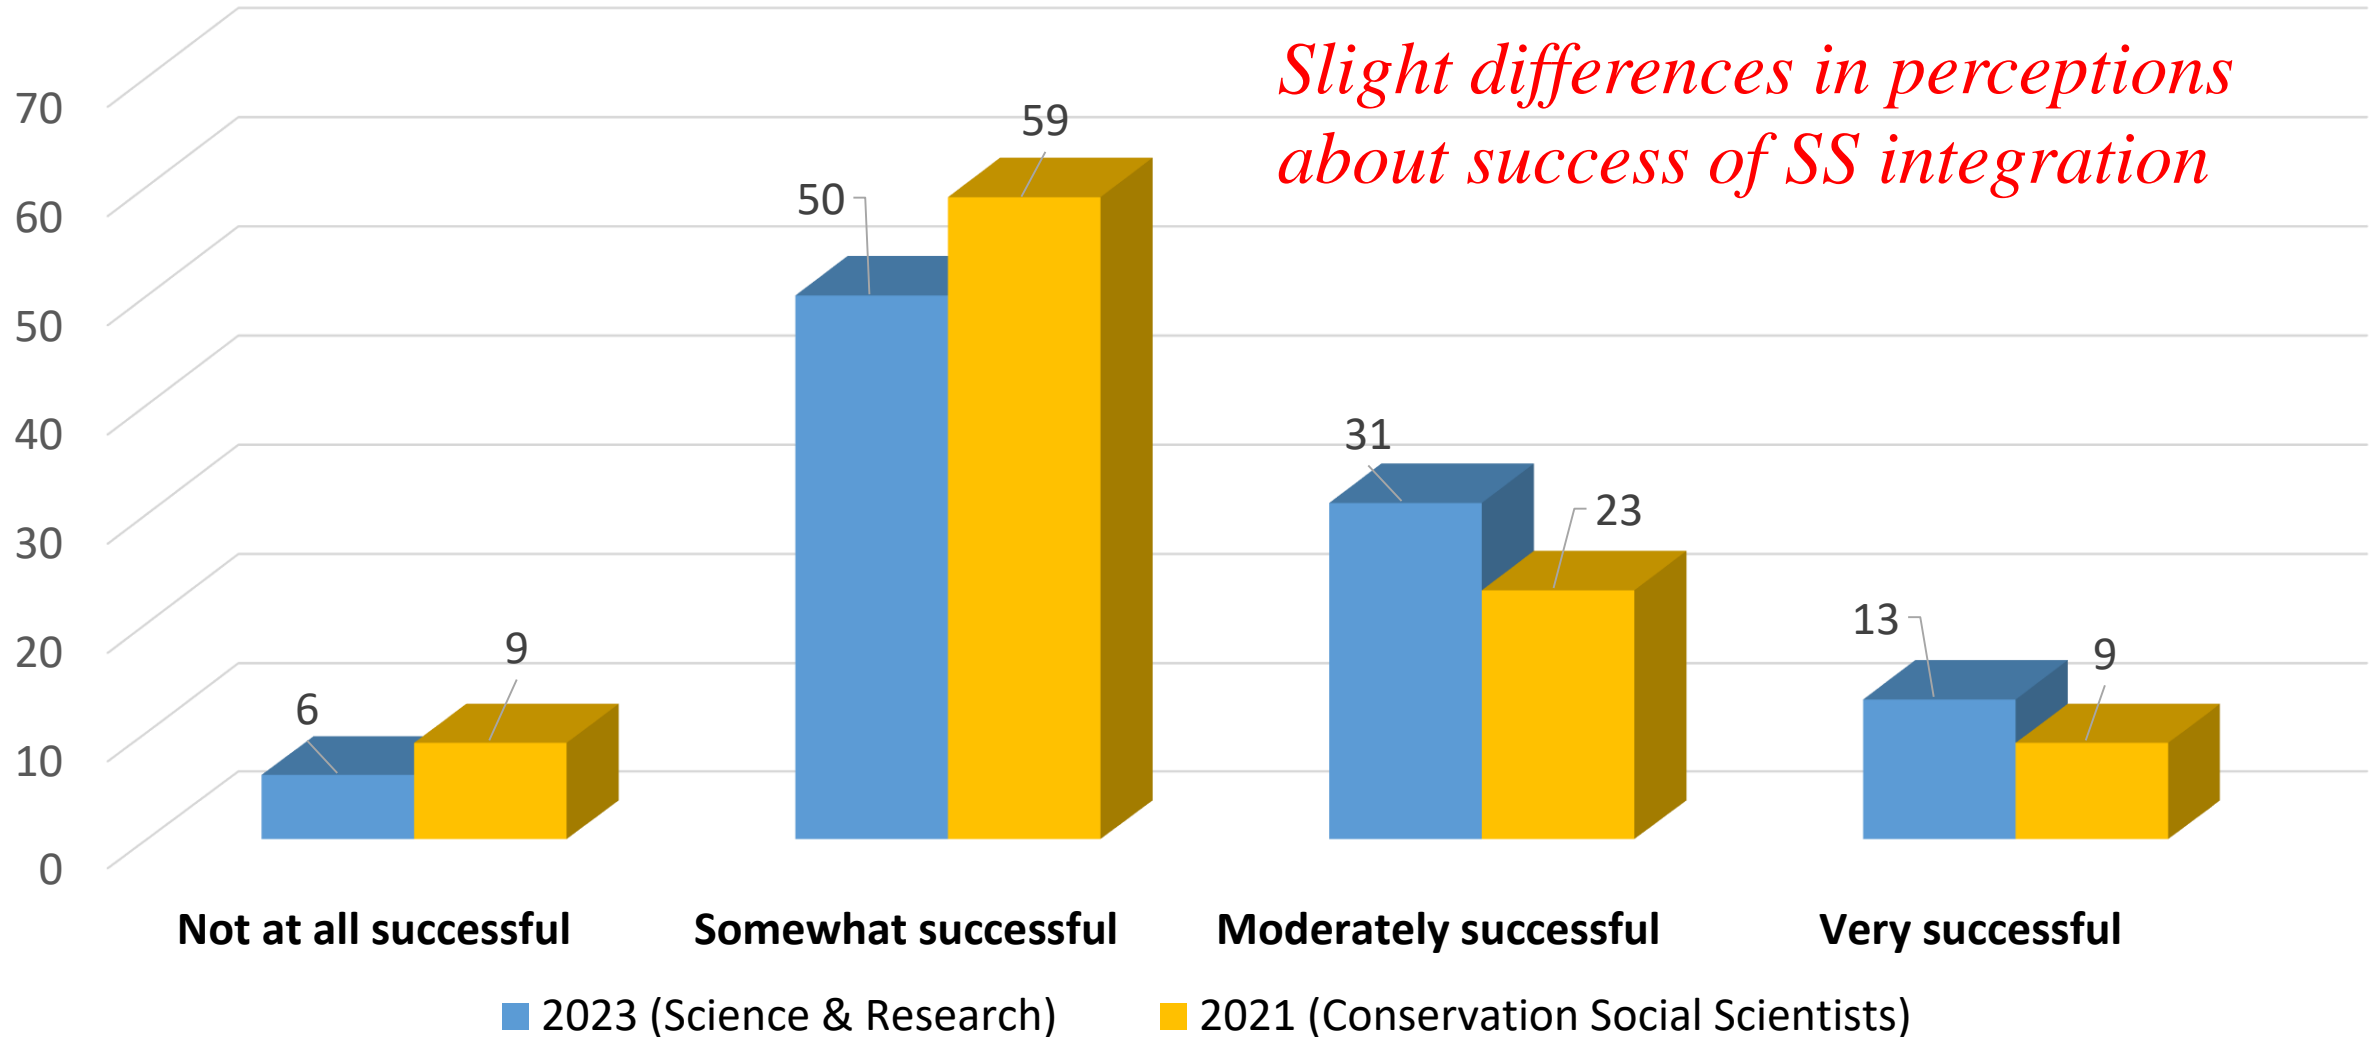

*Rarely used in climate
change & invasive species
research
(never-to-sometimes)*
