

26 to July 28, 2008. The comments were thoroughly evaluated, and changes were incorporated into the CCP, where warranted. Some of the changes include adding the impacts of climate change to the list of priority issues facing the refuge and updating the land cover maps with regard to the location of key non-native plant species.

#### Selected Alternative

After considering the comments received, we have selected Alternative B for implementation. Under this alternative, refuge management will focus on improving conditions for sea turtles and other threatened and endangered species, maintaining and restoring habitat, and improving biodiversity on the refuge, while focusing public use activities on partner properties within the larger Archie Carr NWR partnership.

#### Mackay Island National Wildlife Refuge, Currituck County, NC

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Notice of availability: final comprehensive conservation plan and finding of no significant impact.

**SUMMARY:** We, the Fish and Wildlife Service (Service), announce the availability of our final comprehensive conservation plan (CCP) and finding of no significant impact (FONSI) for Mackay Island National Wildlife Refuge (NWR).

**ADDRESSES:** A copy of the CCP may be obtained by writing to: Mike Hoff, Refuge Manager, Mackay Island NWR, P.O. Box 39, Knotts Island, NC 27950. The CCP may also be accessed and downloaded from the Service's Web site: <http://southeast.fws.gov/planning>.

**FOR FURTHER INFORMATION CONTACT:** Mike Hoff; Telephone: 252/429-3100; Fax: 252/429-3185.

**SUPPLEMENTARY INFORMATION:**

#### Introduction

With this notice, we finalize the CCP process for Mackay Island NWR. We started this process through a notice in the **Federal Register** on November 3, 2000 (65 FR 66256). Mackay Island NWR, in northeastern North Carolina, consists of 8,219 acres, of which 4,251 acres are brackish marsh, 1,515 acres are coastal fringe evergreen forest, 995 acres are managed wetlands (impoundments), and 298 acres are cropland. These habitats support a variety of wildlife species, including waterfowl, shorebirds, wading birds, marsh birds, neotropical migratory songbirds, and deer.

We announce our decision and the availability of the final CCP and FONSI for Mackay Island NWR in accordance with the National Environmental Policy Act (NEPA) [40 CFR 1506.6(b)] requirements. We completed a thorough analysis of impacts on the human environment, which we included in the Draft CCP/EA. The CCP will guide us in managing and administering Mackay Island NWR for the next 15 years. Alternative 2 is the foundation for the CCP.

The compatibility determinations for recreational hunting, fishing, wildlife observation, wildlife photography, environmental education and interpretation, trapping of selected furbearers for nuisance animal management, forest management, and refuge resource research studies are also available in the CCP.

#### Background

The National Wildlife Refuge System Improvement Act of 1997 (16 U.S.C. 668dd-668ee) (Improvement Act), which amended the National Wildlife Refuge System Administration Act of 1966, requires us to develop a CCP for each national wildlife refuge. The purpose for developing a CCP is to provide refuge managers with a 15-year plan for achieving refuge purposes and contributing toward the mission of the National Wildlife Refuge System, consistent with sound principles of fish and wildlife management, conservation, legal mandates, and our policies. In addition to outlining broad management direction on conserving wildlife and their habitats, CCPs identify wildlife-dependent recreational opportunities available to the public, including opportunities for hunting, fishing, wildlife observation, wildlife photography, and environmental education and interpretation. We will review and update the CCP at least every 15 years in accordance with the Improvement Act.

#### Comments

Approximately 100 copies of the Draft CCP/EA were made available for a 30-day review period as announced in the **Federal Register** on January 17, 2006 (71 FR 2560). Twenty-one comments on the Draft CCP/EA were received. The Draft CCP/EA identified and evaluated three alternatives for managing the refuge over a 15-year period.

#### Selected Alternative

After considering the comments we received and based on the professional judgment of the planning team, we selected Alternative 2 for implementation. The refuge will develop a habitat management plan and manage all habitats on the refuge. It will survey a wide range of wildlife. The refuge will continue to allow the priority public uses (e.g., hunting, fishing, wildlife observation, wildlife photography, and environmental education and interpretation) and will have the capacity to increase the number of opportunities for public use.

**Authority:** This notice is published under the authority of the National Wildlife Refuge System Improvement Act of 1997, Public Law 105-57.

#### Multistate Conservation Grant Program; Priority List for Conservation Projects

**AGENCY:** Fish and Wildlife Service, Department of the Interior.

**ACTION:** Notice of receipt of priority list.

**SUMMARY:** We, the U.S. Fish and Wildlife Service (FWS), announce the FY 2009 priority list of wildlife and sport fish conservation projects from the Association of Fish and Wildlife Agencies (AFWA). As required by the Wildlife and Sport Fish Restoration Programs Improvement Act of 2000, AFWA submits a list of projects to us each year to consider for funding under the Multistate Conservation Grant program. We then review and award grants from this list.

**ADDRESSES:** John C. Stremple, Multistate Conservation Grants Program Coordinator, Division of Federal

Assistance, U.S. Fish and Wildlife Service, 4401 North Fairfax Drive, Mail Stop MBSP-4020, Arlington, Virginia 22203.

**FOR FURTHER INFORMATION CONTACT:** John C. Stremple, (703) 358-2156 (phone) or [John\\_Stremple@fws.gov](mailto:John_Stremple@fws.gov) (e-mail).

**SUPPLEMENTARY INFORMATION:** The Wildlife and Sport Fish Restoration Programs Improvement Act of 2000 (Improvement Act, Pub. L. 106-408) amended the Pittman-Robertson Wildlife Restoration Act (16 U.S.C. 669 *et seq.*) and the Dingell-Johnson Sport Fish Restoration Act (16 U.S.C. 777 *et seq.*) and established the Multistate Conservation Grant Program. The Improvement Act authorizes us to award grants of up to \$3 million annually from funds available under each of the Restoration Acts, for a total of up to \$6 million annually. We may award grants from a list of priority projects recommended to us by AFWA. The FWS Director, exercising the authority of the Secretary of the Interior, need not fund all projects on the list, but all projects funded must be on the list.

Grantees under this program may use funds for sport fisheries and wildlife management and research projects, boating access development, hunter safety and education, aquatic education, fish and wildlife habitat improvements, and other purposes consistent with the enabling legislation.

To be eligible for funding, a project must benefit fish and/or wildlife conservation in at least 26 States, or in a majority of the States in any one FWS Region, or it must benefit a regional association of State fish and wildlife agencies. We may award grants to a State, a group of States, or one or more nongovernmental organizations. For the purpose of carrying out the National Survey of Fishing, Hunting and Wildlife-Associated Recreation, we may award grants to the FWS, if requested by AFWA, or to a State or a group of States. Also, AFWA requires all project proposals to address its National Conservation Needs, which are announced annually by AFWA at the same time as its request for proposals. Further, applicants must provide certification that no activities conducted under a Multistate Conservation grant will promote or encourage opposition to

regulated hunting or trapping of wildlife or to regulated angling or taking of fish.

Eligible project proposals are reviewed and ranked by AFWA Committees and interested nongovernmental organizations that represent conservation organizations, sportsmen's organizations, and industries that support or promote fishing, hunting, trapping, recreational shooting, bowhunting, or archery. AFWA's Committee on National Grants recommends a final list of priority projects to the directors of State fish and wildlife agencies for their approval by majority vote. By statute, AFWA then must transmit the final approved list to the FWS for funding under the Multistate Conservation Grant program by October 1.

This year, we received a list of fourteen recommended projects. We recommend them for funding in 2009, contingent on the Multistate Conservation Grant Program receiving additional funds as specified in the Safe, Accountable, Flexible, and Efficient Transportation Equity Act of 2005 (Pub. L. 109-59) passed in August 2005. AFWA's recommended list follows.
